

## ALL of the EXAMPLE SOURCE CODE for this Course

The following is a link to a GitHub.com repository we are using for this course:

<https://github.com/jhu-ep-coursera/fullstack-course4>

It contains:

1. Source code for ALL examples used in this course
2. Lecture Slide PDFs
3. Starter code for end of module assignments.

Feel free to download it as a zip file, or 'git clone' it to your local machine. Cloning it through GIT is the preferred method as you will be able to do a simple 'git pull' to update it when whatever updates come out.
